DGM Virtual PBX

DGM Virtual PBX [Branch Exchange System] is a fully-featured, cloud-based virtual phone system that allows you to free yourself from the limitations of traditional telephony and become seamless and globally connected. There is no equipment to purchase, maintain or upgrade, and its unlimited inbound and outbound calling plans eliminate long distance charges and billing from third party phone companies.

DGM Global PBX Mobile - What is DGM Global PBX Mobile Phone?

This application is the mobile extension of your DGM PBX cloud-based phone system. It offers special features that are usually available only to phones located in your office or at your home.

PBX VirtualApp for Android and IOS

Why do I need the App?

- * Display your virtual phone number (business or residential) on the caller ID when making outbound calls from your
- * Directly dial your phone system internal numbers just as if you were in your office or home.

How does it work?

Simply use the dial pad or contact list on your DGM PBX application to make internal or outbound calls. The application will dial into your DGM PBX virtual phone number, and will automatically connect you to the destination.
